paratacchi per pedane passeggero - heel guards on pillion pegs

Idrostop
se ordinato - if ordered

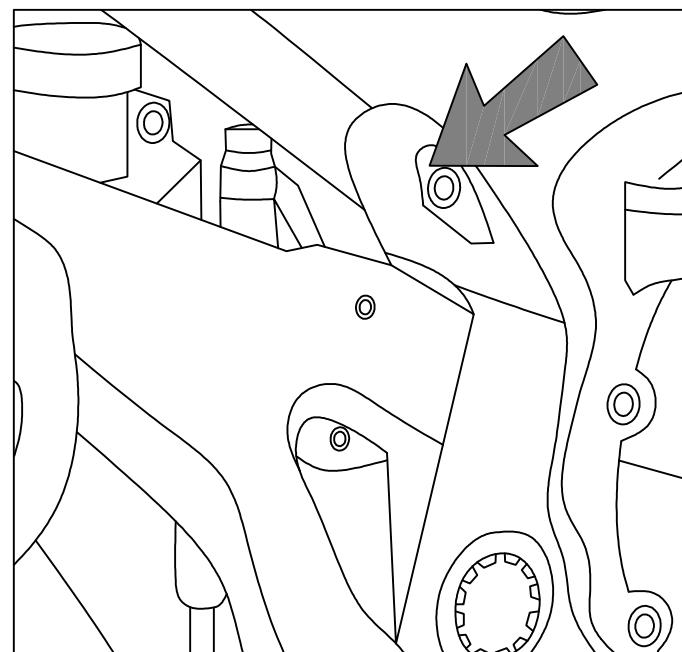

Ducati Monster 821, 1200 (2014-2016)

Smontare i perni esagonali ed estrarre il tubo del telaio fissato in alto sul blocco delle pedane originali.
Infilare nuovo tubo fornito nel kit facendo attenzione ad equilibrare la distanza di uscita nei due lati (circa 45mm).

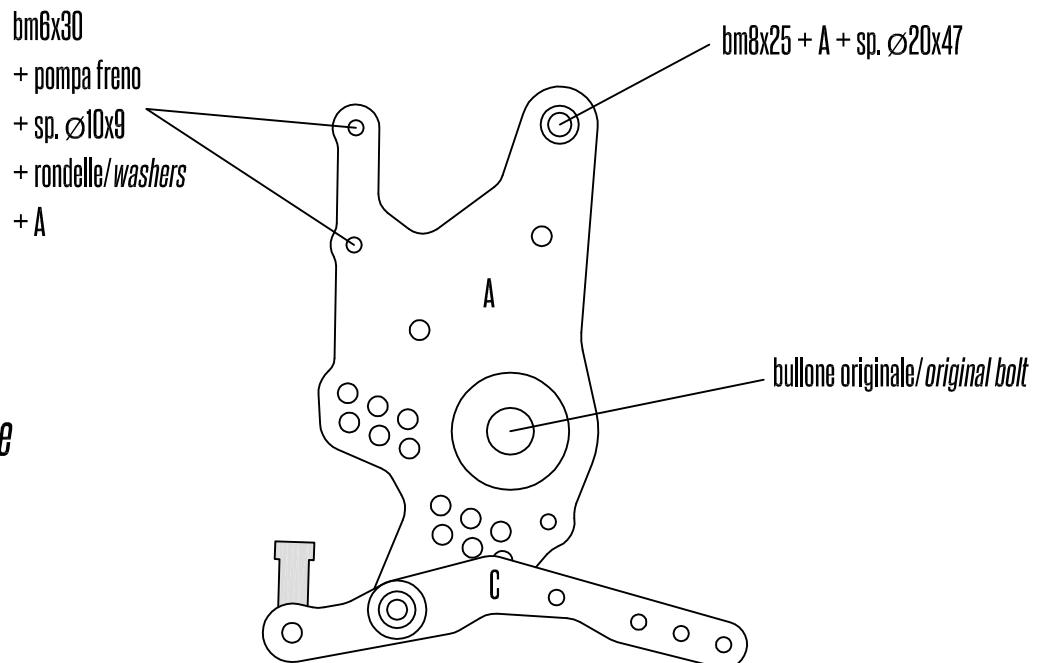

*Dismount the original hexagonal bolts, and remove the chassis tube locked at the top on the block of the original rearssets.
Insert the new chassis tube taking care to balance the output distance on both sides (about 45 mm).*

Su alcuni modelli di moto (es: MT-07 e Hornet >2007) lo spinotto originale è diverso da quello descritto nell'immagine.

Su altri modelli invece il cavo può risultare corto e non permette il collegamento con lo spinotto.

In questi due casi è necessario cablare i fili con l'idrostop per poterlo collegare, oppure usare altri fili come prolunghe.

È consigliabile effettuare lo spurgo al termine del montaggio dell'idrostop, ma non è necessario se l'operazione viene effettuata correttamente.

For some models (ex: MT-07, Hornet>2007) the cable connected is different. In these case you need to cable the original one to connect on idrostop. It's recommended to flush the brake fluid at the end of the idrostop mounting, but it's not necessary if the operation is successful.
